Course Description

Course Description

Web Site Development builds on the skills and knowledge gained in Web Design Foundations to further prepare students for success in the web design and development fields. Emphasis is placed on applying the design process toward projects of increasing sophistication, culminating in the production of a functional, static website. As students work toward this goal, they acquire key skills in coding, project management, basic troubleshooting and validation, and content development and analysis. Artifacts of the work completed in this course will be logged in a student portfolio demonstrating mastery of skills and knowledge. Upon completion of this course, proficient students will be prepared to pursue a variety of postsecondary programs in the computer sciences, sit for industry certification, or apply their skills in a capstone Web Design Practicum. Standards in this course are aligned with Tennessee State Standards for English Language Arts & Literacy in Technical Subjects and Tennessee State Standards in Mathematics.*

*This is the third course in the Web Design program of study - Suggested prerequisites for Web Site Development are Information Technology, Web Design Foundations, Algebra I and Geometry with a strong background in English. * In accordance with the National CSP (Computer Science Principles), it is highly recommended that students meet prerequisites of having completed Algebra I and have strong LA skills before entering this rigorous, entry level course. The course requires a significant amount of expository writing (as well as writing computer code). It is recommended for 10th grade students or above due the expectations of student responsibility and maturity. The course covers a broad range of foundational topics such as programming, big data, digital privacy and security, and societal impacts of computing.

	Course Standards Topics
	Trimester 1
Goal: To provide an environment where students can prepare for work related web design skills for advancement into postsecondary education and industry.	Safety
	Career Exploration
	The Design Process
	Project Management
	Coding with but not limited to HTML, XML, CSS, JavaScript, JQuery,
	SQL, PHP, Ruby, Python, C#.
	Trimester 2 or Trimester 3
	Basic Troubleshooting and Validation
	Content Development and Analysis
	Web Hosting and Publishing
	WED HOSTING BIRG I GUDISHING

	Trend Studies in new and emerging trends in Web Design and			
	Development			
Creding Police:				
Grading Policy:				
	Application Projects 60%			
	Writing Portfolio Journals (Great Start Article Reads) 20%			
	Tests 10%			
	1000 1070			
	Keyboarding 10%			
Attendance Policy:	In order to be successful in this class, students must constantly engage with			
•	others, team paring is essential to growth as well as completing assignments			
	and projects. If assignments are turned in late due to an EXCUSED absence,			
	they must be turned in within five days of the absence. Failure to meet the			
	school designated time limit will result in a zero. Assignments missed as a result of an unexcused absence will result in a zero.			
	result of an unexcused absence will result in a zero.			
Plagiarism/Academic Dishonesty	O Plagiarism and academic dishonesty are serious offenses. The			
Policy:	academic work of a student is expected to be his/her own effort.			
Toney.	Students must give the author (s) credit for any source material			
	used.			
	O Students must not copy another student's work electronically and			
	present it as their own. A grade of Zero will be given and will be			
	reported to the administration.
